

Research Methodology Guide

Synthetic sample knowledge-base document for local RAG testing

Overview

Sample research concepts covering questions, hypotheses, sampling, data collection, analysis, and limitations.

Key Information

1. A research question defines what the study is trying to understand or measure.
2. A hypothesis is a testable statement about an expected relationship or outcome.
3. Sampling determines which observations or participants are included in a study.
4. Limitations should be reported clearly so readers can interpret the findings appropriately.

RAG Test Notes

This document is intentionally concise and contains distinctive terms so that semantic retrieval can identify it when a user asks a related question. It is sample content and should not be treated as professional, legal, medical, financial, or regulatory advice.
