

Azure Data Factory Overview

Synthetic sample knowledge-base document for local RAG testing

Overview

Concepts for pipelines, activities, linked services, datasets, triggers, and parameterization.

Key Information

1. A pipeline groups activities into an orchestrated data movement or transformation workflow.
2. Linked services define connection information to external or internal data systems.
3. Datasets describe the structure or location of data used by activities.
4. Parameters allow one pipeline definition to work with multiple environments or inputs.

RAG Test Notes

This document is intentionally concise and contains distinctive terms so that semantic retrieval can identify it when a user asks a related question. It is sample content and should not be treated as professional, legal, medical, financial, or regulatory advice.
