

Customer Service Standards

Synthetic sample knowledge-base document for local RAG testing

Overview

Sample standards for response time, issue ownership, escalation, and customer communication.

Key Information

1. A customer service interaction should begin with clear identification of the request or problem.
2. The person handling a case should communicate the next action and expected follow-up when possible.
3. Escalation is appropriate when an issue exceeds the agent's authority or requires specialist support.
4. Case notes should be factual, concise, and sufficient for another agent to continue the work.

RAG Test Notes

This document is intentionally concise and contains distinctive terms so that semantic retrieval can identify it when a user asks a related question. It is sample content and should not be treated as professional, legal, medical, financial, or regulatory advice.
