

Data Warehouse Concepts

Synthetic sample knowledge-base document for local RAG testing

Overview

An introduction to dimensional modeling, fact tables, dimensions, and analytical workloads.

Key Information

1. A fact table stores measurable business events such as sales, shipments, or transactions.
2. A dimension table provides descriptive context such as customer, product, date, or location.
3. A star schema commonly places a fact table at the center with related dimensions around it.
4. Analytical warehouses are optimized for querying historical data and business metrics.

RAG Test Notes

This document is intentionally concise and contains distinctive terms so that semantic retrieval can identify it when a user asks a related question. It is sample content and should not be treated as professional, legal, medical, financial, or regulatory advice.
